

Flexible Summer Camps!

- 1 hour each week!
- Pick your day/time each week (same lesson offered 4 different times weekly)
- No commitment – Sign up for one week or all!
- \$50 each session/max of 5 students

Summer Skills Refresh Camp!

Summer is a great time to relax, but it can also lead to the "summer slide," when students lose some of the math skills they worked so hard to build during the school year.

The Math Bridge Summer Skills Refresh Camp is an 8-week program designed to keep math skills strong and students confident heading into the next grade.

Students attend one 1-hour session per week. Each session reviews the most important readiness TEKS from the grade students just completed, reinforcing the foundation needed for next year's success.

Multiplication Mastery Camp!

Multiplication fact fluency is one of the most important foundations for success in upper elementary math.

This 8-week summer camp will help students build a strong understanding and automatic recall of **multiplication facts 1–12 through strategies, patterns, and visual models—not just memorization.**

Students attend one 1-hour session per week, and parents can choose the day and time that works best for their schedule.

Summer Skills Refresh Camp

Dates	Entering 4th	Entering 5th	Entering 6th
Jun. 8-11	Place Value	Place Value	Equations & Expressions
Jun. 15-18	Fractions	Fractions & Decimals	Mult./Divide Decimals
